Eastern India Science Fair

What it is all about

It is a large-scale presentation of science exhibits by school students of Eastern India States where creation and innovation is at its best. Organized since 1975 by BITM, one of the units of National Council of Science Museums, scientific talents in the grass root level are brought to the forefront. The models and exhibits displayed here tries to give ready solutions to the commonly faced technological problems encountered by people, especially in rural India. This event, not only involves the students but their schools and teachers also.

Science & Engineering Fair

Some facts

Engineering Fair was mooted to bridge the gap between the innovative concepts of the engineering students with the profit-oriented requirements of the industry. With this in mind Engineering Fair was launched from 2002 onwards where students of engineering college participate with their research oriented projects on various avenues of science & technologies. The technologists and academicians evaluate these projects or exhibits.

Representatives from the industry who visit these fairs and offer important suggestions to the students as to what modifications are required to suit the needs of the professional world.
